

To whom that this concerns:

I think that the changes of medicaid to going to private insurance companies is going to take more time than what is being allowed before January 1, 2016. The providers haven't even been told what these insurance companies are going to pay or their coverage. The 560,000 clients of Medicaid don't know if they will be able to go to their same health care providers that they have now. With the four new insurance contracts that are being proposed by Governor Branstad and legislators' Is the care going to be provided that the clients are getting now or are they going to be cut to less care? How is private insurance going to save money when all these providers have to do all this paper work for their clients when these clients have different health providers and all with different health issues. I feel that this process of these 4 insurance contracts are being pushed to quickly for the clients. health care providers, and the 30,000 providers. Lets take the time that is necessary to get things done right so it can be successful for the 560.00 clients, 30,000 providers, and the health care providers instead of doing this in a rush, rush, hurry up get in done by January 1, 2016 thinking.
